Summary

Software Engineer with strong fundamentals in cross-platform Mobile (React Native / Android) and Full Stack Web Development. Experienced in building responsive UI components, designing RESTful APIs with Node.js/Express, and managing relational and NoSQL databases. Passionate about mobile architecture, API design, and performance optimization.

Skills

Languages: JavaScript (ES6+), Java, Python, SQL, HTML5/CSS3

Mobile Development: React Native, Android Fundamentals (Activities/Services), Redux / Context API

Web & Backend: React.js, Node.js, Express.js, RESTful APIs, JWT Authentication

Databases & Cloud: PostgreSQL, SQLite, Firebase (Auth, Firestore), MongoDB

Tools & Core Concepts: Git, GitHub, Postman, VS Code, Data Structures & Algorithms, System Design

Experience

Blockstack Pvt Ltd

April 2026– Present

Technical Intern

Bengaluru, India

- Developed cross-platform mobile application modules using **React Native** and Java/Android native bridges, improving render performance across screen densities.
- Designed and integrated custom **RESTful APIs** using **Node.js** and **Express** to manage real-time client-server communication and database synchronization.
- Built secure user authentication and state management workflows using **Firebase Auth**, Context API, and encrypted client-side storage.
- Profiled application performance and API endpoints using **Postman** and React Native Debugger to identify payload bottlenecks and optimize JSON responses.
- Implemented unit and integration tests using **Jest** to ensure reliable UI components and API response handling.
- Optimized database queries and schemas to improve data retrieval speeds for user session sync.

Projects

E-Commerce Mobile Application | React Native, Java, Node.js, Express, PostgreSQL

- Developed a full-featured cross-platform mobile shopping application with product catalogs, cart management, and REST API integration.
- Implemented secure **JWT** user authentication, persistent local caching using Async Storage, and push notifications for order updates.
- Architected a Node.js/Express backend connected to a **PostgreSQL** database, utilizing indexed SQL queries for fast search and pagination.

Full-Stack Task & Workflow Management Platform | React.js, Node.js, Express, MongoDB

- Built a responsive web dashboard for real-time project management and team collaboration.
- Designed modular RESTful API endpoints supporting multi-user CRUD operations, role-based access control, and request validation.
- Integrated **MongoDB/Mongoose** schemas to handle dynamic user data with low query latency.

Certifications

- Junior Software Developer – NSDC Skill India Mission

Education

MIET Meerut (AKTU)

2022 – 2026

Bachelor of Technology (CSE - Data Science) – CGPA: 8.08

Intermediate (Class 12): 80% (2021) | **High School (Class 10):** 83.33% (2019)
